McAfee Client Proxy 4.3.1 Hotfix 1 Release Notes

Hotfix (GA)

Contents

Information about McAfee Client Proxy 4.3.1 Hotfix 1 release

Apply this hotfix to fix the McAfee Client Proxy crashing issue when secure channel was enabled.

Release date — 24 Mar 2022

Release build — Windows 4.3.1.1

Note: This hotfix does not support the automatic upgrade of a pre-release software version. To upgrade to a production release of the software, you must first uninstall any pre-release versions.

Rating

The rating defines the urgency for installing this hotfix.

This release is mandatory for Windows environments. Failure to apply mandatory hotfixes might result in a security breach. Mandatory hotfixes resolve vulnerabilities that might affect product functionality and compromise security. You must apply these hotfixes to maintain a viable and supported product.

Resolved issues

This hotfix addresses the following customer-reported issue.

Reference	Resolution
MCP-4811	The McAfee Client Proxy now functions as expected while running the Automatic Policy Download feature through the Secure Channel. (Windows only)
MCP-4812	Addresses the BSOD while running McAfee Client Proxy in presence of Windows Defender after enabling the Secure Channel option. (Windows only)
