## CASB Connect Use Case Checklist

---

### Data Loss Prevention (DLP)

Ability to monitor content uploaded/updated in cloud service and enforce DLP policies.

- Is this use case important? (Yes/No)
- Specify the types of content objects you would like to monitor for DLP.

---

### Secure Collaboration

Monitor sharing activity with external users and enforce secure collaboration policies to modify sharing permissions automatically.

- Is this use case important? (Yes/No)
- Describe how content can be potentially shared with external users from this cloud service.

---

### Activity Monitoring and UEBA

Maintain an audit trail of user and administrator activity for forensic investigation and detect anomalies/threats based on user behavior patterns.

- Is this use case important? (Yes/No)
- Specify the kind of activities you are interested in and what information you would like to see in these activities. (If possible, provide an accurate list of activities and metadata you would like to see as part of activity logs.)

---

### Contextual Access Control

Block users from performing a few types of activities (for example, file downloads) from unmanaged devices

- Is this use case important? (Yes/No)
