Information about McAfee Client Proxy 4.1.1 Hotfix 1 release

This hotfix resolves an issue in the Windows environment to connect to RDP or log in to Windows after upgrading to McAfee Client Proxy to 4.1.x.

Release date — 21 April 2021

Release build — 4.1.1.113

Note: This hotfix does not support the automatic upgrade of a pre-release software version. To upgrade to a production release of the software, you must first uninstall any pre-release versions.

Rating

The rating defines the urgency for installing this hotfix.

This release is mandatory for the Windows environments. Failure to apply this mandatory hotfix might affect product functionality. You must apply this hotfix to maintain a viable and supported product.

Resolved issues

This hotfix addresses the following customer-reported issue.

Reference	Resolution
MCP-4131	This hotfix fixes the delayed proxy redirection issue.
MCP-4173	After upgrading McAfee Client Proxy to 4.1.x, this hotfix allows you to connect to RDP and login to the Windows system after log off.

For a list of current known issues, see McAfee Client Proxy Known Issues ([KB83131](#)).

Installation instructions
