What's new in the 3.2.0 release

This release includes the following enhancement. In addition, this release resolves the issues listed in the **Resolved Issues** section.

Enhancements

- Even when a primary proxy server is down, McAfee Client Proxy redirects the traffic marked for alternate redirection to the alternate proxy server.

Resolved issues in the 3.2.0 release

For a list of current known issues, see [McAfee Client Proxy Known Issues \(KB83131\)](#).

Resolved issues

Reference	Resolution
MCP-2820	Client Proxy now bypasses IPv6 traffic when configured in bypass mode. (Mac only)
MCP-2843	The Client Proxy now poll the alternate proxy server at the polling interval specified in the policy. (Windows only)
MCP-2844	While generating the bypass key, the Client Proxy was displaying error in English for other locales before providing the identification code of the user. (MVISION ePO only)
MCP-2864	Non-admin users can now view the Client Proxy policies. (McAfee ePO only)

Reference	Resolution
MCP-2937	Client Proxy no longer sends http request to mcp.webwasher.com continuously. (Windows only)
MCP-2996 and MCP 3423	The policy revision number is correctly updated when you modify the Client Proxy policy. (McAfee ePO Cloud and McAfee ePO)
